

Hold the dates!

Dear parent/carer,

Year 8 Science Festival

We are delighted to announce that the year 8 Science Festival will be running the morning of Monday the 9th of March 2020. You are invited to come and see the wonderful science projects that our year 8 students are investigating.

In addition, this year all of our year 8 students will be entered for their Bronze CREST award for completing their science festival projects. The CREST award is an internationally recognised award run by the British Science Association.

If you have any question about the Year 8 Science Festival please email Mrs Manning at smanning@elycollege.co.uk

Family STEM evening

We are also excited to announce that we will be holding our annual Family STEM evening on Thursday the 5th of March. This is an event open to the families of year 7 and 8 students (bring the whole family!). Last year's inaugural event was great fun with families competing to make rubber band powered race cars. This year our families will be building trebuchets and competing to see who can create the most accurate device of mini-destruction. We plan to run the evening from 5.00-7.00. There is no cost. Spaces are limited, please email Mr Craven at scraven@elycollege.co.uk to register your interest or if you have any questions.
